

# INSTALLATION INSTRUCTIONS INSTRUCCIONES DE MONTAJE

## Safety instructions / Instrucciones de seguridad

### Precautions / Precauciones:

It is important that you read, fully understand and observe the following safety instructions as well as the installation instructions.  
Careless or improper handling may cause injury or property damage.

*Es importante que lea, comprenda completamente y respete las siguientes instrucciones de seguridad, así como las instrucciones de montaje.  
El manejo descuidado o inadecuado puede causar lesiones o daños a la propiedad.*

Good footwear is very important. Wear sturdy boots with nonslip soles. Steel-toed safety boots are recommended.

*Un buen calzado es muy importante. Póngase botas gruesas con suela antideslizante. Recomendamos las botas de seguridad con puntera de acero.*

Knee-protection is recommended!

*¡Recomendamos la protección de rodilla!*

Always wear gloves when handling and installing the mats. Heavy-duty, nonslip gloves improve your grip and help to protect your hands.

*Siempre use guantes cuando maneje y monte los pisos de goma. Los guantes gruesos y antideslizantes mejoran el manejo y ayudan a proteger las manos.*

### During installation / durante el montaje:

Do not stand or work under suspended load (pallet)!

*¡No se pare ni trabaje bajo carga suspendida (palet)!*

- Do not underestimate the weight of the mats. Improper handling may cause injury.
- Only use the recommended tools.
- Observe the safety instructions of the tools' manufacturers.
- Caution when cutting: blade may move quickly through the rubber mat. Be sure you are cutting away from your body.
- Pallets can be broken! Watch out for splinters and / or nails!
- Take care to remove edge protectors or other small parts of packaging from cow feeding areas!

- *No subestime el peso de los pisos de goma. El manejo inadecuado puede causar lesiones.*
- *Solo use las herramientas recomendadas.*
- *Respete las instrucciones de seguridad de los fabricantes de herramientas.*
- *Tenga cuidado al cortar: la cuchilla puede moverse rápidamente a través del piso de goma. Asegúrese de estar cortando lejos de su cuerpo.*
- *¡Los palets se pueden romper! ¡Cuidado con las astillas y / o los clavos!*
- *¡Tenga cuidado de quitar los protectores de bordes u otras partes pequeñas de los envases de las áreas de alimentación de las vacas!*

### After installing / después del montaje:

Caution!  
Cows will be more active!  
*¡Cuidado!  
¡Las vacas podrían ser más activas!*

Watch out for uneven edges if the floor is only partially covered.  
*Tenga cuidado con los desniveles en los bordes si el piso está cubierto solo parcialmente.*

Residues on the rubber may cause slippery condition while and shortly after installing!  
*¡Los residuos sobre la goma pueden causar condiciones resbalosas durante y poco después del montaje!*

# KRAIBURG KURA / profiKURA for Rotary Parlor

## Requirements:

### concrete area:

- smooth
- clean
- minimum 4" (10 cm) thick

### mats:

Installation Temperature:  
minimum 41°F (5°C) to maximum 86°F (30°C) (be sure internal temperature of mats falls within above range)

## You will need this:

### measuring:

### marking:

### cutting:

**!** refer to your local sanitation regulations for restrictions on anchoring mats in the milking parlor

## 1 Lay out mats

**i** Start with the first mat in stall of your choosing

always flush with the edge!

example

join mats loosely together, lift them slightly and gently pull them apart

**!** avoid creating tension!

DO NOT PRESS!

DO NOT PULL ON ONE SIDE ONLY!

**!** at low temperatures: pull the puzzle seams so far apart that an opening becomes visible

Appropriate installation may differ due to local conditions. Therefore the manufacturer is not liable for installation!

## 2 Custom Trimming:

Cut mats to fit

**!** Important: draw the radius onto the mat so that the pockets can be cut out exactly.

### **i** tips for cutting:

- moisten the blade lightly
- pull the mats slightly

(use pliers for pulling small pieces apart)

- a **power jig saw** is most suitable for cutting **profikURA**

example:

take measurements within the parlor

starting point

draw measurements onto the **mat**

**i** tip: bend measuring stick to draw radius and measurements onto the mat

## 3 If necessary, fasten mats - PLEASE CHECK WITH YOUR LOCAL DAIRY INSPECTOR

If necessary, fasten each mat 3 x on inner radius:

drill

pound in anchors and washers until they are seated firmly and are slightly countersunk

**tip:** Check to see if the anchor can be felt with a flat object made of metal (e.g. hammer) by sliding it over the anchor. If it can be felt, pound it in deeper!

a small gap should be visible

**do not pound in too strongly**

no tension should develop, the mat should not bulge!

Appropriate installation may differ due to local conditions. Therefore the manufacturer is not liable for installation!
